

Late Winter Tour

This year, our late winter tour, held on February 20th, was a visit to Overstreet House of Cars. Overstreet House of Cars is home to a privately owned family collection that has actively purchased and sold classic cars since 1998. It started as a hobby with great American Muscle Cars from the 1960's and before you know it the chrome and fins on the cars from the Fabulous 50's were getting their attention. Eventually, the one of a kind Hot rods with pre war body styles, late model comforts and fancy paint jobs were on the list.

The folks at Overstreet were gracious hosts and we were able to view so many great cars including some that have been featured in national magazines or were built by name builders. It was kind of cool to see that two of the displayed cars still had our car show paid sticker on their window.

After the tour, we headed to Train Wreck at Westport for an early lunch. We thank Jim Biermann for setting up this great late winter tour.
